The European Wood Collection is made up of hand-selected European French Oak top layers. Our Engineered wood is available in a variety of elegant traditional patterns including Herringbone and timeless Chevron. The Engineered floors are suitable for different climates. This specific wood is made to expand and contract depending on humidity and temperature and is moisture resistant. The floors are constructed of layers including a thick European French Oak-top layer, and our multi ply core™ premium substrate suitable for use with radiant and underfloor heating systems. All of our Engineered floors are FSC Certified with UV oil finish for easy maintenance and preservation of your hardwood floors.

The Santorini Wood Collection is made up of hand-selected European French Oak top layers. Our Engineered wood is available in a variety of elegant traditional patterns including Herringbone and timeless Chevron. Our Engineered floors are suitable for different climates. This specific wood is made to expand and contract depending on humidity and temperature and is moisture resistant. The floors are constructed of layers including a thick European French Oak-top layer, and our multi ply core™ premium substrate suitable for use with radiant and underfloor heating systems. All of our Engineered floors are FSC Certified with UV oil finish for easy maintenance and preservation of your hardwood floors.
